ADVANCED INJECTABLES

COURSE OUTLINE
& SCHEDULE

EDUCATION ROOTED IN INNOVATION

As the world of aesthetic medicine continues to evolve and grow, IIAM is committed to providing exceptional, continuous hands-on training, for those looking to expand their services portfolio. Setting and delivering the gold standard in this ever-evolving field is our mission.

Optimal patient outcomes are at the heart of everything we do, and safety is a top priority. Our Advanced Injectables course was designed to deliver training for those looking to explore treatments for intricate and complex areas of the face. Facial anatomy around the eyes, temples, jawline and more make these areas dangerous for the untrained injector to treat. Our 2-day hands-on, detail-oriented training will set alumni apart in both patient satisfaction, and treatment results.
